6B

* Traditional definition

→ The person who leads or commands a group, organization or country.

* Management is the administration of an organization, whether it is a business a not-for profit organization or gov body. Management includes the activities of setting the strategy of an organization & coordinating the efforts of its employees to accomplish its objectives through the application of available resources, such as financial, material, technological & human resources.

• The term management may also refer to those people who manage an organization individually managers.

• Social scientists study management as an academic discipline, investigating areas such as social organization & organizational leadership.

• Some people study management at Commerce (Bcom), BBA, MBA in a public sector.

- larger organizations generally have three levels of managers, which are typically organized in a hierarchical pyramid structure.

- Senior manager, such as members of a board of directors & chief executive officer (CEO) or president of an organization.

- Middle manager

- Low manager

* Managing People: One responsibility of a manager is controlling a group in order to accomplish a specific goal.

* Leadership: It is the ability of an individual to motivate, influence & enable other employees to make a contribution to the success of an organization.

* Management involves identifying the mission, objective, procedures, rules & manipulation of the human capital of an enterprise to contribute to the success of the enterprise.

- planning, organizing, commanding, co-ordinating, controlling.

* leadership is both a research area & practical skill.
